# Erratum to: Validity of data collected in BIOREG, the Austrian register for biological treatment in rheumatology: current practice of bDMARD therapy in rheumatoid arthritis in Austria

Bernhard Rintelen<sup>1,2\*</sup>, Jochen Zwerina<sup>3</sup>, Manfred Herold<sup>4</sup>, Franz Singer<sup>5</sup>, Johann Hitzelhammer<sup>6</sup>, Wolfgang Halder<sup>7</sup>, Gabriela Eichbauer-Sturm<sup>8</sup>, Rudolf Puchner<sup>9</sup>, Miriam Stetter<sup>10</sup>, Burkhard F. Leeb<sup>1,2,11</sup> and on behalf of the BIOREG investigator group

## Erratum

After publication of the original article [1], it came to the authors' attention that in the third paragraph of the 'Discussion' section, the value of DAS28 in NEW included patients is indicated wrongly, although correctly cited in Table 2. The correct form of the erroneous sentence is as follows:

"NEW patients' median disease activity according to the DAS28 before starting bDMARDs is in the lower range in BIOREG compared to other European bDMARD registries (4.46 compared to 4.2–6.6), while median HAQ-DI scores are in a comparable range (1.0 vs 0.8–1.9)."

To correct the original sentence, "(4.46 compared to 4.2–6.6)" should be updated to "(4.13 compared to 4.2–6.6)", and "in the lower range" should replace "somewhat lower".
